

Be Conscious of the Real You Q & A

8th June 2011

Desirus:

Now if there are any questions we would gladly answer.

Q: When you talk about diseases could you throw some light on what's happening in Germany with this E. coli bug and where does it come from?

A: Call it a mutation – a necessary mutation. There will be a cure. We do not want to scaremonger but this is slightly artificial or what you would call manmade. There will be a cure and after that, there might be another hiccup. Yes you are pointing to Germany - it will just show you how small and interconnected your planet is. Do not fear. This will last a little while but there will be other diseases.

Q: Is the cause of it from what they have sprayed – from the water – what has created this?

A: The cause is water-based but it has been tampered with, and I would not worry. There will be one or two who will suffer but again it is the forerunner. It is the fear of the unknown; it is the abuse of the masses and the abuse of your money. So, it is time to come to grips with what could happen in your so-called mass-productions. As you know these, what you call pesticides, are not what we had planned but unfortunately, it seemed necessary, now it has gone too far and there will be a great resistance towards these new diseases. Again, it is of vital important that you get taught how to cleanse and to heal yourselves. But also since you live in the material world in a different dimension, use what you would call your common sense. You do inhabit a physical frame. Try not to be afraid. Would that answer your questions?

~ Yes thank you.

Q: You were talking about travelling in your mind to other galaxies and I wondered if anybody in history has already done that?

A: Oh Yes, Oh Yes.

~ 1 ~

~ Anybody in particular? Or, are any of the works of fiction we have or film...

A: Any work of fiction is based on experience – past stories. There are very few works of so-called fiction. They might have exaggerated and there will be many more works of fiction all based on a little more truth than you think. You are all one big story. Past, present, future - and since each of you is a story, don't be surprised that stories repeat themselves and get better and better. So, your fiction is based on truth for if you tell a story don't you exaggerate it? That's what happening – there is a point of truth and then you make it better and better. Would that answer your questions?

~ That's a good answer – yes.

A: And we do enjoy those stories for you are nearer to the truth than you can imagine. It is a shame that so many of you still have the blindfold on but as we said what you would call the veil is thinning or getting more transparent - also due to your communication but so many of you are asking questions that it will be possible to have a little bit more knowledge of life - true life. Do not be too gullible. Find your own truth and remember - power and peace and love and unity is important, more important than all these complicated scientific experiments.

There already is communication with those not inhabiting your planet but as you would say it is kept low-key. Remember the power of thought is important. Would that answer your questions? Communication will be easier. Try to receive the healing, which is being given and with that, we say until we meet again.

~ Thank you.
