

Q & A
7th September 2011

Desirus:

And with that, if there are questions we will be glad to answer; if there are none we leave you with joy and peace.

Q: Could I ask you from your perspective what affect this, I don't know if it's a planet or a comet – but everyone is talking about Elenin...

~ That is a nice name...

I probably have it wrong – I've been trying to remember - but there's a lot of talk about the effect it might have on earth – could you give us clarity on that.

A: Its effect upon earth as you call perspectives, its effect will be a heightening of perception – it has a ripple effect. If you would go the scientific way that would be different. It will interest those who are still half asleep and connect them more to universal thought. Would that answer your question? That it is main purpose.

~ So it's bringing a positive effect rather than the negative?

If you would like drama and negativity, we can do that as well.

Would it heighten that?

It would heighten the perception – heighten the senses. And yes, it might destabilize those who are in your language not so grounded.

Q: I have one question; you were saying that some of us go to part of your other side when we go to sleep...

~ That is so.

~ How do we know because there seems to be different types of dreams or sleep – what's the purpose of it?

A: You will know when you meet, not only those who have preceded you, but it is possible to visit other residences, towns, and places – you will know. That is the first level, the second level is when you reconnect with friends or family or maybe the wise ones. The next step is for those who have the capability of visiting those in need - there are various degrees some of you can reach. We would say that those who, as you would say, have out-

~1~

of-body experiences, they will find it much easier to come to our side once what you would call the cord is cut - there will be no fear; but those, and there are many, who you would call adept – they are able to leave their physicality at will and come back.

Now you have all heard of the main prophecies – some of the elders or wise ones disappeared as you might say – into thin air. Not all of them perished on the earth plane – there was a group of elders, who as you might put it – left your planet and are still - as all of you know the body perishes the mind survives - these elders were able to wander off your planet – very few. So we do not do prophecies really and very few of you will be able to do that.

If you have to talk in numbers not more than twenty-six, as you see, and this is what you would say tongue-in-check - not more than twenty-six are able, at this point in earth time, to come to our side and come back and that will not be on show...put it like that. Is this a truth? Is it a myth? Is it nonsense? We talk to you tongue-in-check but it is a definite possibility – it can be done and it has been done and it was done by this group of elders and before them as well.

You would call it science fiction, but let us be precise each one of you present has been to what we would call halfway to the other side where one has a meeting ground – during the sleep state one of you can do this at will and has pure recollection. So, imagine if you could do that - all of you – what traffic there would be. Does that answer your question?

~ Yes thank you

Q: If one asks permission to be able to remember where ones been in sleep states...

A: That will be given, but it does take practice.

~ Right, because one does have glimpses and then occasionally I remember but mostly I forget within a second.

~ You will remember what is useful and what you don't need will still be integrated. You will not remember what is of no use at that point in time – you would be on what you would call overload.

~ Certainly, the dreams one does seem to remember are pretty sort of what I would call low astral imagination. They certainly don't seem to take one into the higher realms – that's from my experience.

~ You will go there in good time. If you would go into what you would call higher vibrational spheres, you might not want to come back.

~ It's just nice to have a little taster...

~ That's why most of you do not remember. For again, you will be without blinkers and those of you who have such thirst for learning and exploring will really not want to come back. Coming back on your planet you will, either to help or to enjoy but there is so much to learn and to clear and to do where you *will* go – that it would be of no use – not now. Some of you will reach higher vibrational spheres but there comes what you would call a cut-off.

Q: May I ask something – can you talk about the portals that are on the earth and what the portals are meant for and what kind of energy these portals are releasing to the planet at the moment?

A: There are several portals, which are – call it, portals of communication or energy tunnels. Be very wary of opening new portals for it will be done and it has been done in a very irresponsible way. Where there's light; there's darkness. There's also a lot of - you like being blunt – nonsense. There's a lot of negative matter. We create and we know you can create portals. Some of them facilitate travel - and here we go, for some of you, science fiction – to different planets but do not for an instant think that this cannot be done by the higher energies themselves. If you create a portal know why and what is it to facilitate? The light? Right, don't create too many. Does that answer your question?

~ But will there be new earth portals?

As the magnetic field around the planet changes there will be new earth portals. It's not doom and gloom but try not to create too many portals yourselves for you do know – one can, you can, you can and you can create a portal - do this in good faith with the light but do not be irresponsible there. These portals have to be protected at all times as well – would you understand that?

There is a huge portal in a place near the Americas – this is important. It is where what you would call volcanoes erupt. That is a good portal, it is important. And there are several and there will be more – do not create too many.

Q: So could I ask you this – with the ancient sights like Stonehenge, Avebury, you know, and a lot of the sacred sights around the world are they what I want to call old portals...?

A: Do not underestimate the energy there – we would suggest to protect them for especially Avebury has been infiltrated and cleansed, and infiltrated and cleansed. It does need care.

What is old? We would ask. There has been a lot of energy – is one portal better than another is? Yes. Should you abandon these places? No - they still hold communication.

Q: Is there a portal in the Middles East and if so, is this the one that the negative energy is leaving the planet through and that's why there is a lot of conflict at the moment?

A: And there will be more conflict - that is so. This cleansing will have to go on a little while and there will be more. Ultimately there is free will. There is a slight repetition in a different way. There are those who, what you would say, are dabbling a little bit – would that make sense...

~ With the occult?

~ Oh yes. There is one portal, which in your language sucks out negativity from the crust of your planet – would that answer your question?

~ Would that be the portal in Jerusalem?

~ We are talking of a different one. Jerusalem has not played its last part - it is useful. There is also a portal in what you call Yugoslavia – there are several portals – active still. It is in hand – the plans will not be changed. Keep it simple, observe and send out light – it is important to have clusters of what you would call like-minded ones. You are more powerful than you can ever imagine and you are much needed. As long as there's no fear, no panic amongst yourselves.

And yes, you are under observation. That is all right but never underestimate your journey on earth. Do not get disempowered by theories and by those who seem to know it all for deep down you are all one, never forget that. You are on a planetary journey; this is what we would call a heavy practical journey.

Q: There's something I would like to ask you, it's a broader picture about the London riots – was that an enormous release of energy – you know of the earth energy as well?

A: Do not look too much into that. That was a protest. If you look into your records, you would call it history – it is history repeating itself and yes, it did unleash a lot of negativity, which was turned into something more positive believe it or not. It made some of you

~ 4 ~

more aware, more compassionate. It made some of you very angry – but it did unleash a lot of emotions.

Q: Will we be seeing much more of that around the country as there must be a lot of blocked energy and earth energy as well?

A: There will be a different kind of rebellion. Remember any rebellion is not that bad. Your country is important. It is coming more alive. It has its role to play – like others. And remember this is a time of rebellion and change on your planet, not only in your country. It is much needed.

~ Thank you.

And with that, remember try to simplify and feel and for those of you who can – imagine and enjoy your journey – it is important and we do recognize that and a little sense of humour - we do like that as well. Make music for soon, for us soon, your earth planet will sing.

Until we meet again, maybe in your sleep states.
