

**Q & A**  
5<sup>th</sup> October 2011

**Desirus:**

And with this we would ask you – are there any questions?

*Q: Could you explain a little the energies that are coming in on the 11.11.11?*

**A:** There we go again! Numbers, numbers, numbers. We would rather you go into your feelings to start. Yes, the energies coming in will be of a higher vibration but if you are not capable of raising your own vibration, it will bypass. It is important to raise your consciousness slightly to receive, to acknowledge and to - while this is a very planetary word - to *profit* from these vibrations. So, again, do not judge. Meditate or contemplate for there will be energies coming through which will be difficult to absorb for some of you. You will not get ill - you will just not receive them. It will be like a shower instead of an internal quickening.

These vibrations are coming in. Some of them have already come in and yes, the number 11 is important, as other numbers will be; but it is still important for all of you to prepare the groundwork. Look at it from Nature's point of view - the soil has to be ploughed and prepared, then when the seed is planted, it will thrive. Would you understand that?

*~ Yes.*

Indeed, there will be many changes, but your changes will come from within. Would that answer your question?

*~ Yes thank you.*

It is important to listen and to acknowledge the power of your voice, your music, your colour and your inner beauty. We do not prophesize that all of you will be able to walk on water, but those who experience a slight quickening will be able to feel much lighter; no fear, a different kind of communication as well. It is not telepathy but you will communicate in a slightly different way not bypassing the emotions but the emotions will be lighter and some of you will be able to talk and speak to each other soul to soul instead of person to person. The feelings will be lighter.

*Q: I have one question – what do you think about astrology in general - the kind that we have – as in the twelve zodiac signs.*

**A:** There will be more – we do not think, but as you know there are many planets and astrology, as it now, will slightly change - but it is useful. Your astrology has always been a helpful tool. There will be a slight change but do not judge that too harshly for those who call themselves astrologers have a feeling - call it an intuitiveness which helps them greatly. Everything is changeable but do not discard what you would call astrology – would that answer your question? There will be a slight change in timing. So, if you are born under a certain sign – take it a little bit broader – that will do. You add a little bit here, you add a little bit there. Don't discard it.

*Q: Could I ask, I don't really know what to ask, the words judgment and justice; I don't really know what the question is that I am trying to ask...*

**A:** The heaviness inside does not come from justice or judgment except if you observe yourself and instead of judging, you smile - have an inner smile. Look at the antics of self and others. Judgment is a word, which kind of carries heaviness – do you not think so? You are all part of the same source – little particles. Do not take yourselves so seriously. You do live in separation so there is a tendency to look here and to look there - and maybe contemplate instead of judging and yes, your journeys are not always that easy but that is the way you so wanted it to be. You are a beautiful being - remember that - having an interesting journey.

So, remember contemplation and forgiveness, this is important - and to forgive is to forgive yourself. Would that answer your question?

*~ Yes thank you.*

*Q: There's one question I'd like to ask – which there's been a lot of talk of – which is about the solar discs which, it is said, are going to be reactivated – do these solar discs serve a purpose? I think they are meant to be twelve discs situated around the world....*

**A:** We do not think there are only twelve and yes, everything serves a purpose. Do you mean the solar flares, the discs, and the changing of the magnetic field?

*~ Yes.*

For change there will be. Observe, enjoy, that is about all you can do – for there are more than twelve.

*~ What was their original purpose?*

Their original purpose has to do with the Logos. Would that answer your question?

*~ Yes – and is that why they were put in strategic places on the planet, or are they actually in the etheric or the invisible world?*

What would you call the invisible world?

*~ Another dimension.*

To us, nothing is invisible.

Now, do not break your imagination - it will soon become clear but your numbers are not quite as they should be. Now the number twelve is important in your tradition. We find this amusing - very amusing - but is this knowledge going to help you? Think. We do not think so. It is true that there are many earth crystals, it is true that your planet is also inhabited by many other energies, it is true that there is planetary activity but unless you experience this - know and observe and try to enjoy the moment, would that answer your question?

Soon you will be able to see more if that answers a desire. You will.

And with that, if there are no more questions we will look forward to the next time when we will, as you would say, meet again.
